

ArtMesh Software Versions

Version 3.4.558 (date of issue 2016-01-20)

Restriction for trial version is introduced. Number of cells of input surface mesh must be less than 10000.

Version 3.4.557 (date of issue 2015-11-20)

STL files support is added.

Version 3.3.554 (date of issue 2015-09-20)

Some slight improvements in meshing algorithm.

Version 3.3.553 (date of issue 2015-08-08)

1. New meshing method is added: triangulation with nodes placement similar to the approach which is used for quad meshing (look at parameter `method=tri_orto` in command `meshing_file`).
2. Percentage of meshing progress is written to file `artmesh_instance_id_[0001]`. Look at section "Some technical details for software integration".
3. Auxiliary parameters `file_in` and `file_out` are added.
4. Some slight improvements in meshing algorithm.

Version 3.2.547 (date of issue 2015-07-19)

Some slight improvements in meshing algorithm.

Version 3.1.545 (date of issue 2015-06-07)

The first version.
